# CHILD DEVELOPMENT GRAPHICS

- **OVER 4,300 HIGH QUALITY IMAGES**
- **AVAILABLE ON DVD OR ONLINE**
- **ACCESS IMAGES AT SCHOOL OR AT HOME!**
- **SIMPLY COPY AND PASTE TO USE AN IMAGE**

This superb collection of over 4,300 quality graphics is now available for standalone or network installation. An optional online subscription facilitates access to the images for both students and staff (at school and at home) and gives immediate access to new images. It is now easy to produce or enhance lesson/revision notes, projects, posters, presentations, worksheets, web pages, etc. The integral graphic viewer allows you to easily view the images and then simply copy and paste your selection into any other application. Child Development Graphics is just one of over 30 unique sets of images in the SSER educational graphics library - to see the full subject range visit [www.EducationImages.com](http://www.EducationImages.com).

**Easily Create Flashcards Posters, etc!**

### Testing and checking

The **APGAR** test is carried out immediately after birth. It measures Appearance, Pulse, Grimace, Activity and Respiration. A score over 7 is good, a score under 4 means resuscitation is necessary.

	Appearance	Pulse	Grimace	Activity	Respiration
0	Blue arms and legs	No pulse	No response to stimulation	Limp and floppy no movement	Not breathing
1	Pink and blue on body	Pulse under 100 beats per minute	Slight whimper in response to stimulation	Some movement of arms and legs	Slow and irregular breathing
2	Pink all over	Pulse over 100 beats per minute	Cries loudly in response to stimulation	Good movement	Breathing well

**14 MAIN CATEGORIES AND 15 FURTHER SUB CATEGORIES PROVIDE DETAILED COVERAGE FOR TOPICS SUCH AS PREGNANCY, IMMUNITY, MEDICAL CARE, ETC.**

### Baby Feet

Babies' feet grow very quickly. There is no need for them to have shoes until they can walk.

Soft booties or sockers will protect their feet and keep them warm, but it helps feet to grow strong if they can go barefoot.

Children's feet should be measured every three months.

Shoes should give support to the foot and have adjustable fastenings. They must have at least 15mm growth space at the front.

Leather is ideal as it is hard-wearing and breathable.

#### Breast feeding

Just before birth, milk glands are stimulated by the hormones progesterone and oestrogen to produce a clear, sticky substance, which the baby feeds on for the first 2 to 5 days. Colostrum contains proteins and antibodies to protect the baby against diseases.

The milk glands are then stimulated to produce milk around 3 to 5 days after birth. This process is called lactation. The sucking action stimulates the milk glands to produce more milk. The action of the baby's head and arms pressing on the areola (the area around the nipple) triggers the let-down reflex.

#### Advantages of breast feeding

Breast milk is at the right temperature and contains all the right nutrients. It contains antibodies to protect babies from illnesses. No preparation or sterilising are required. The baby's sucking action releases hormones to help the uterus to return to normal size. It helps the mother to lose excess weight gained during pregnancy and helps mother and baby to bond. And it's free!

Breast milk can be expressed using a breast pump and fed to the baby from a bottle and teat. This can be of benefit to mothers who go to work or go out and leave the baby to be looked after.

# ALL CHILD IMAGES ARE 'MODEL RELEASED' & YOU CAN THEREFORE USE THE IMAGES WITH CONFIDENCE IN THE EDUCATIONAL ENVIRONMENT!

The Child Development Graphics DVD is supplied with a fully featured Graphic Viewer. View all the graphics in this outstanding collection by category or select images by searching using keywords. Selected images can then be copied via the clipboard into MS Word, Publisher, PowerPoint or any Windows program. The Graphic Viewer has the facility to add annotations within rollover hotspots to any image - this is particularly useful when you project the image or view it through an interactive whiteboard. SSER are leaders in the field of educational graphics and we provide you with detailed instructions, advice and telephone support.
